“This is about much more than software – it’s about using the internet to enable students to gain timely information about their academic progress. The University will also save time and costs associated with elements such as the paper trail of applications, registrations, examinations and paper-based course assessments.”

Professor Derrick Armstrong, Deputy Vice-Chancellor (Education) and Registrar, University of Sydney

Features

- Scalable solution used across institutions ranging from 1,000 to over 50,000 students.
- Supports the entire student lifecycle from enquiries, applications, enrolment, progression, grades, graduation and alumni.
- Platform and database independent – Oracle and Microsoft databases, UNIX and Microsoft operating system options.
- Over 140 University and College customers across the globe including the UK, Ireland, Scandinavia, Mediterranean, Caribbean, North America, Canada, China, Australia and New Zealand.
- Used by 60% of all HEI’s in the UK.
About Tribal

Tribal is a leading provider of systems and solutions to the international education, training and learning markets. Working as one, we focus on helping our customers to deliver excellence. Our extensive expertise and collaborative style has made us a trusted partner to our customers. We have 1,400 staff and our work spans five continents.

What we do

- We are the number one provider of student management systems to Higher Education, Further Education and Training Providers in the UK
- We are the number one provider of college, school and nursery inspections in the UK on behalf of Ofsted
- We are the number two provider of Children’s Management systems to Local Government in the UK
- We are implementing technology to support one of the world’s largest educational change programmes in New South Wales, Australia

“Tribal’s system will provide us with the configuration tools to enable us to support administrative processes more effectively, which in turn underpin our teaching and learning activities. This will enable us to provide a more rapid and cost-effective response to process and policy change alongside an enhanced user experience.”

Keith Zimmerman, Director of Student Administration and Services, University of Oxford

Our Student Management Systems

Our market-leading student management systems support learners of all ages across a range of education phases.

We improve the way information is collected, collated, analysed and shared, providing rich functionality through an intuitive and engaging user interface. Our wraparound services provide value-added information and support for data, security, storage and implementation.

Our systems are designed to interface with each other, as well as with a wide range of other applications from finance systems to learning management systems (LMS).

We are implementing our SITS:Vision solution as part of major change management programmes at both the University of Oxford and University of Sydney. Our customers include University of Warwick, University College London and University of British Columbia, amongst many others.
About SITS:Vision

The functionality of SITS:Vision is delivered through five component areas that are modular by design, allowing institutions to use those areas that are required to meet their business needs, but are still integrated within a single system.

Components include:
- Student Recruitment and Admissions
- Programmes and Timetabling
- Students
- System Tools and Reporting
- e-Vision (self-service web portal)

Working as one to deliver a student admissions system fit for the 21st century

The University of London International Academy (UoLIA) was founded by Royal Charter on 28 November 1836, and is the third oldest university in England. Today, more than 22,000 students study at its 18 colleges across the capital. The University wanted to move from a heavily paper-based student administration system, which used an outdated legacy system, to an operational system conducted predominantly online across all business process areas.

As an existing user of the SITS:Vision Student and Course Management System, Tribal worked with the University to help it move towards a paperless online system that could support a fully integrated stock control and warehouse distribution system for study material, online payments, and deliver improvements in data quality and integrity.

Through using Tribal’s Enterprise Service Desk (ESD) enquiry management and the Admissions, Enrolments and Assessment modules, the solution has assisted the university with improving the overall service to students, with registration time cut from weeks to days and a 40% reduction in the cost of processing each application.

Online credit card payments are up from 10% to 75%, significant savings in print and courier costs have been realised and by 2017 they fully expect to have achieved savings in excess of £7.89 million.

UoLIA have seen substantial improvements in data quality and timely information delivery through SITS. By 2017 they fully expect to have achieved savings in excess of £7.89 million

UoLIA has reduced the cost of processing direct applications by 40% and cut average application turnaround from 15 days to 5 days
