Student Support

Better for students, easier for you; all in one place

EMPOWERING THE WORLD OF EDUCATION

As education providers are becoming more customer focused there is an increased emphasis on providing effective, high quality support to students.

Student Support covers the whole student lifecycle and every support requirement from recruitment through to enrolment, including a sophisticated knowledge base and enquiry, case, appointment and queue management. It provides critical insights into performance at all stages to allow early intervention and successful outcomes.

Student Support is fully web-based and offers a secure integration to an existing student portal, third party portal or content management system. It can be used across multiple sites or departments providing one effective solution for student services.

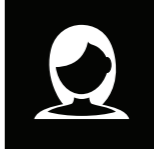

It provides a single view of all student issues with access to sensitive information based on staff permissions. Counsellors can create private case notes and upload files concerning students they are supporting and log correspondence with external organisations ensuring case management is effectively tracked and managed.

Student Support Product Family:

<p>Student Support: Welfare</p> <p>Student case management</p>	<p>Student Support: Central</p> <p>Full student lifecycle enquiry management and knowledge base</p>
